

## Visitor Attractions

Discover what Amazonia, The Famous Grouse Experience and Glasgow's Science Centre all have in common.

Our engineers have many years experience in the installation and maintenance of Audio Visual Visitor Exhibits and it's helped some of Scotland's best loved sites put the wow factor in front of their customers.

What these exhibits have in common is that none of them are off the shelf, stock exhibits but rather are bespoke technology showcases that we have helped create – and always for a reasonable budget.

### Amazonia – Interactive Jungle Exhibit

M&Ds Theme Park and their partners JEM Digital wanted to install an immersive AV exhibit and turned to us to help design, install and maintain the solution. Using twin projectors, capture camera, LED washed green wall and full audio this solution has it all.

The system used components from Panasonic, Tannoy and Sanyo.

*"The results allow visitors to enjoy watching themselves within another world – they can actually interact with it – by making selections, playing games and participating in activities."*

Becky Scott, Amazonia.

### The Famous Grouse Experience – New Visitor Centre

In order to set the scene in their recently refurbished Visitor Centre we needed to create a thunder and lightning effect on the Perthshire Hills – all activated with a simple aluminium vandal proof button.

The system used components from Nuvo and Digit.

*"The strobe light installed into the lightbox is a great idea – thanks for all your help with this"*

Sara Boyle - SPD

### Glasgow Science Centre – Digital Signage & PA

The Management at Glasgow's Science Centre IMAX Theatre wanted to install a digital signage solution that would showcase forthcoming features to their customers and allow them to deliver instructions on seating plans, 3D glasses and more. We specified and installed a unique solution with push to talk mic, high viewing angle commercial displays and PADS digital signage.

The system used components from LG, PADS, Unicol, Monacor and Bose.

*"Access AV were a great company to work with from start to finish. They brought ideas to the table to help work around unforeseen problems during the planning stages"*

Robert Johnstone, IMAX Manager.
